Renewable Energy and Energy Efficiency: Economic Drivers for the 21st Century, by Roger Bezdek

Report on a comprehensive study by the American Solar Energy Society on the renewable energy and energy efficiency industries. Includes definitions of the industries, estimates on size and composition, and a forecast of the industries' growth to 2030 under three scenarios. Discusses potential for great economic benefit assuming support for growth of these sectors in regulations and policy.

Greener Pathways: Jobs and Workforce Development in the Clean Energy Economy

Produced in partnership with The Workforce Alliance and Apollo Alliance, Greener Pathways explores current economic and workforce development opportunities in three leading industries: energy efficiency, wind, and biofuels. The report also highlights federal resources that can support state green jobs initiatives, and concludes by outlining a plan of action for state policymakers.
